

Barrel sauna BS16

€4,961.00

Compact outdoor sauna (L:160 × D:200 cm) – ideal for smaller spaces and quick heating. Equipped with a Harvia Vega 4.5 kW electric heater for efficient temperature control and even heat distribution. LED lighting creates a cozy atmosphere, and the full panoramic glass front offers stunning views of nature. Made from premium Scandinavian spruce wood, this sauna is durable, stylish, and perfect for any garden or holiday home.

Adjustments for your outdoor sauna:

To ensure the sauna stands stable, all that is required is a flat surface and good access – the entrance to your yard should be convenient both for delivery and installation.

Electrical installation (applies only to sauna sets with an electric heater or lighting):

UAB SPA EUROPE does not perform electrical installation work from your house to the sauna. However, this is an easy task for a qualified local electrician.

Delivery costs and time:

The production time after advance payment is approximately 4–10 weeks, depending on production workload.

Delivery is included in the price within Lithuania, Poland, Germany, and Austria.

If delivery is required to a difficult-to-access location, additional costs may apply. For delivery to other countries, please contact us by email.
