Wooden box for sand filter

€133.10

The wooden box is for storing the sand filter. Protects against extraneous natural factors.

The light-colored wooden box is made of spruce or pine boards.

The brown box is made of thermal wood, so when painting it in a different color, you need to consider that the shade will be different from ordinary fir or pine wood.

- Color **Natural**
- Form **Square**
- Type of wood **Spruce**
- Type of wood **Thermowood**
